

The BOSSnet software suite delivers operationally smart IT solutions and is a powerful tool to assist hospital staff to improve patient outcomes through its innovative, flexible and powerful Electronic Medical Record (EMR).

BOSSnet Mobile App enables the healthcare team to access patient information via mobile applications within the BOSSnet software suite.

The use of mobile devices such as tablets and smartphones is increasing significantly in all industries and healthcare is no exception. BOSSnet Mobile App has been created as a supplementary avenue of access to the BOSSnet platform in addition to the traditional desktop services, with an emphasis on finger-friendliness, layouts optimised for smaller screens and utilisation of mobile device capabilities not normally available on desktop platforms.

BOSSnet Mobile App provides a simple user interface and touch screen user input to leverage the convenience of mobile connectivity. It provides clinicians access to patient information to maximise patient care through accessing mobile device capabilities such as camera and barcode scanning, GPS positioning and notifications.

Key features of BOSSnet Mobile App

- ▶ **PATIENT INFO ON THE GO**
Access patient information via mobile devices with access to information remotely.
- ▶ **OPTIMISED VIEWS**
Designed with easy to view small screen layouts with a focus on finger-friendly usability.
- ▶ **BRING YOUR OWN DEVICE**
Tech savvy users are increasingly bringing their devices to work and looking to use them. Supplement access to the Electronic Medical Record without having to provide new workstations and sacrifice valuable desk space.
- ▶ **UP THE PACE OF CLINICAL INFORMATION**
Entering clinical data directly into the EMR from devices in hand using BOSSnet eForms provides immediate access to the latest details for other members of the care team, and the business as a whole.
- ▶ **BARCODE SCANNING**
Users can launch directly into Clinical Results, Observations and the Medical Record with a simple barcode scan. No more having to enter MRN's or patient names.
- ▶ **CLINICAL PHOTOGRAPHS**
Enrich the EMR with clinical photographs taken at the bedside and securely included in the medical record without leaving photographs behind on devices. Eliminate the practice of well-intentioned staff sharing clinical photographs in an uncontrolled manner over email and messaging.
- ▶ **FULL EMR ACCESS**
View the complete BOSSnet EMR software suite and enter patient information via your mobile device.

Leading edge technology

The BOSSnet software suite is built on leading edge technology providing a highly adaptable platform, loaded with inbuilt and user generated functionality to maximise data capture, interoperability and usability.

As well as the traditional capabilities of a fully functional EMR, BOSSnet Mobile App provides numerous unique tools to deliver real advantages for client usability and effectiveness.

- ▶ The location services of modern devices, including GPS positioning, can be used to restrict access to devices on campus increasing information security.
- ▶ Push clinically relevant notifications such as diagnostic result arrival directly to hand so that clinicians can act as soon as possible to deliver care and reduce bed block.
- ▶ BOSSnet Mobile App camera integration provides a seamless method for clinicians to easily take and upload photographs to the correct patient record, ensuring they are correctly identified, secure, auditable and available permanently as a part of the patient record.
