

The BOSSnet software suite is a powerful tool to assist hospital staff to improve patient outcomes through its innovative, flexible and powerful Electronic Medical Record (EMR).

BOSSnet Imaging provides electronic delivery and viewing of image data and reports to your referrers simply, securely and swiftly.

BOSSnet Imaging offers an intuitive user interface that requires no training and minimal ongoing customer support from your organisation. It incorporates proprietary image compression and streaming technology to provide the ultimate in rapid and secure electronic delivery of images over the internet enabling access from home, secondary workplaces or mobile devices.

BOSSnet Imaging does not require the use of any particular patient management software suite. It provides a uniform quality of service which enables GPs and Specialists to have convenient and highly efficient access to their patient's results and images from within the familiarity of their chosen patient management software.

Key features of BOSSnet Imaging

▶ SIMPLE

Professional look and feel for your referrers without overwhelming complexity.

▶ SPEED

Unmatched speed in the display of lossless quality image for low bandwidth environments.

▶ VIEWING TOOLS

Manipulation tools such as pan/zoom, brightness/contrast, single/multi-frame display, invert, rotate and cine.

▶ INTEGRATES

Proprietary technology allows direct access from within all patient management software such as Medical Director, Best Practice, Medtech32, Locum, Medical Spectrum and Genie.

▶ 24/7 ACCESS

Using internet connectivity, clinicians are able to remotely review studies and reports from outside the surgery 24/7.

▶ SIMULTANEOUS DISPLAY

Diagnostic reports and images displayed simultaneously.

▶ SECURE

Patient privacy is maintained with strict security protocols, allowing the clinician access to only relevant studies. Clinicians can discretionally share study access to allow specialist opinion or further review.

▶ MOBILE

Pocket-PACS access to reports and images at the bedside, at a secondary place of work, or simply out-of-office.

Leading edge technology

The BOSSnet software suite is built on leading edge technology providing a highly adaptable platform, loaded with inbuilt and user generated functionality to maximise data capture, interoperability and usability.

As well as the traditional capabilities of a fully functional EMR, BOSSnet Imaging provides numerous unique tools to deliver real advantages for client usability and effectiveness.

▶ Proprietary image compression and streaming technology to provide the ultimate in rapid and secure electronic delivery of images.

▶ Reports and images are simultaneously displayed in split-pane allowing the report to contain citation to readily identified image of interest.

▶ Manipulation tools such as pan, zoom, brightness, contrast, single or multi-frame display, invert or rotate.

▶ Incorporates Core Medical Solution's HL7/PIT/XML, DICOM BOSSnet Messaging application to economically accommodate your securely encrypted messaging needs.

▶ Administrative tools allow for ongoing analysis of referral patterns and specific details of BOSSnet Imaging use.

▶ Display and entire study as thumbnails to give the referrer absolute control and flexibility. Referrers can view as much of as little lossless detail they wish in the timeliest manner.
