BOSSNET™
MESSAGING

Allscripts®

The BOSSnet software suite is a powerful tool to assist hospital staff to improve patient outcomes through its innovative, flexible and powerful Electronic Medical Record (EMR).

BOSSnet Messaging is a tool for electronic data exchange and patient management interface with external sources.

The secure exchange of information between hospitals and the community setting has become increasingly vital for patient safety and continuity of care. As health organisations embrace electronic generation and storage of patient data, the need to exchange this information in a manner which is quick yet secure is growing.

BOSSnet Messaging is a tool used to deliver documents to General Practitioners and other referrers, as well as episode event notifications, results, and direct submission to the

patients "My Health Record". It is a secure messaging application which interfaces with existing data stores using secure PKI encryption technology to exchange patient information over simple internet connection. It delivers information patient management software package used by community GPs and other referrers.

BOSSnet Messaging enables reliable and consistent communication with General Practitioners and other referrers by automating and streamlining processes to ensure timely and accurate information exchange.

Key features of BOSSnet Messaging

▶ **AUTOMATIC NOTIFICATIONS**
Send automated notifications to GPs and other referrers such as admissions, preliminary discharge summarises, working diagnosis and handover notes.

▶ **MY HEALTH RECORD**
Upload documents directly to the patients "My Health Record".

▶ **EFFICIENT**
Removes manual practices such as traditional mailing or faxing of results and documentation.

▶ **SUPPORT SERVICE**
Total support can be offered, allowing community referrers to contact CMS directly for support instead of the hospital.

▶ **PREPOPULATED CUSTOMISED TEMPLATES**
Prepopulate customised templates with relevant information from the legacy Patient Administration System automatically to the GP or referrer.

Leading edge technology

The BOSSnet software suite is built on leading edge technology providing a highly adaptable platform, loaded with inbuilt and user generated functionality to maximise data capture, interoperability and usability.

As well as the traditional capabilities of a fully functional EMR, BOSSnet Messaging provides numerous unique tools to deliver real advantages for client usability and effectiveness.

▶ Integration with all major practice management systems that support industry standards.

▶ Secure delivery of messages electronically directly into practice management software.

▶ Can be deeply integrated with the medical record for advanced functionality such as admission and discharge notifications.

▶ Any document available in BOSSnet can be delivered to any number of recipients.

▶ In addition to standard HL7, BOSSnet Messaging also supports delivery via document format (such as MS Word or PDF), email and fax.

▶ BOSSnet Messaging is capable of two way messages, both downloads and uploads.
