

The BOSSnet software suite is a powerful tool to assist hospital staff to improve patient outcomes through its innovative, flexible and powerful Electronic Medical Record (EMR).

BOSSnet Orders is a comprehensive toolkit for investigation and consultation ordering with inbuilt logic and intelligence to streamline the referral process.

Legibility and traceability are known benefits of an electronic order entry system and BOSSnet Orders has evolved over more than a decade to deliver a streamlined referral process. It is equipped with easy to develop eForms as well as advanced order entry tools to enable client configuration to suit your hospital and healthcare needs.

Broadly, BOSSnet Orders is a tool used to request services from other parties including electronic generation, tracking and dispatch of electronic referrals, requests and prescriptions. BOSSnet Orders is not confined to patient services alone, it also provides advanced functionality that enables many sites to automate various service requests.

Key features of BOSSnet Orders

▶ CONFIGURABLE

System administrators can configure orders to enhance the order entry process tailored to your healthcare needs.

▶ AUTHORISATION CODES

Set up and prevent certain grades or types of staff from ordering types of investigations.

▶ PREVENTS ORDER DUPLICATION

Prevent re-ordering of investigations which have recently been ordered.

▶ ORDER PROMPTS

Suggest alternatives for out-dated/ unsupported investigations.

▶ INVESTIGATION COST SUMMARY

Provide clinicians with the respective expense of each investigation.

▶ DATA PROMPTS FOR COMPLETE REFERRAL PROCESS

Mandate additional questions or minimum data requirements before accepting a referral.

▶ AUTOMATIC DATA FEEDS

Once investigations have been undertaken, automatic data feeds from respective internal or external diagnostic service provider systems will populate BOSSnet Results review in real-time.

▶ REAL-TIME RESULTS

Instant update of orders and results.

Leading edge technology

The BOSSnet software suite is built on leading edge technology providing a highly adaptable platform, loaded with inbuilt and user generated functionality to maximise data capture, interoperability and usability.

As well as the traditional capabilities of a fully functional EMR, BOSSnet Orders provides numerous unique tools to deliver real advantages for client usability and effectiveness.

▶ Allows closed loop ordering where orders and subsequent results can be managed and followed up.

▶ Create and save order sets for commonly used combinations of orders/referrals.

▶ Allows collection of referral data on eForms, with subsequent benefits such as reduced data entry for information already know by the system, re-use of information in later parts of the record and the ability to report on collected data.

▶ Clinicians can be notified about new referrals via sms, pager, email etc.

▶ Referral documents and their changing status are available instantly in the patient record for all users to see at any time.

▶ Ability to completely track and audit the referrals process, eg, response times, KPIs and the number of referrals accepted or rejected.
